

eSIM Setup Guide

eSIM Compatibility Check

Before activation, please check if your mobile device is compatible with eSIM.

1

Type: *#06# in "call"

2

If you see the "EID" in your Device Info, then your phone is eligible for eSIM.

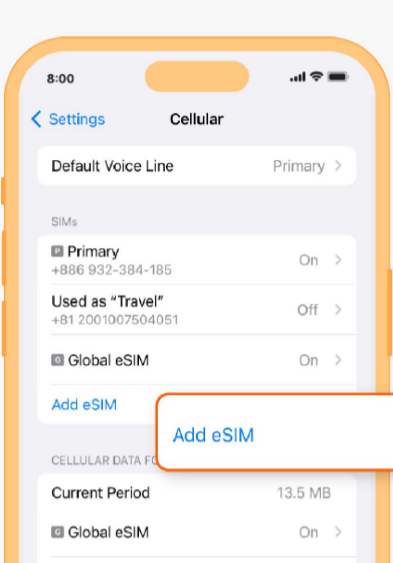

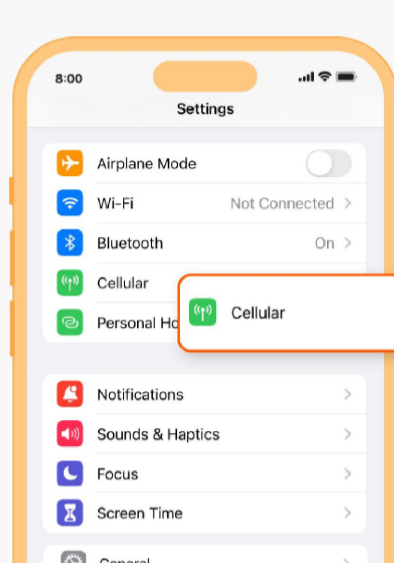

1.

Activate your eSIM

For a successful installation, you **MUST** have a stable WIFI connection

Add eSIM data plan
Settings -> Cellular -> Add eSIM

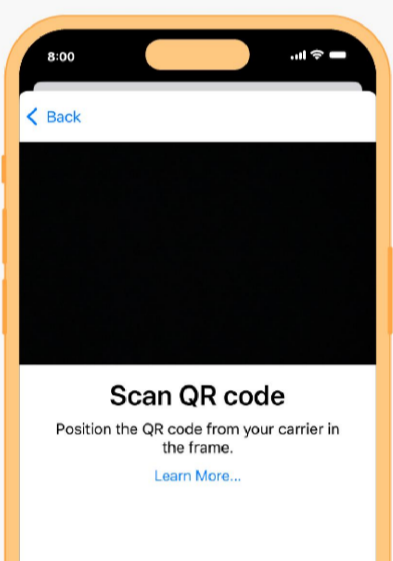

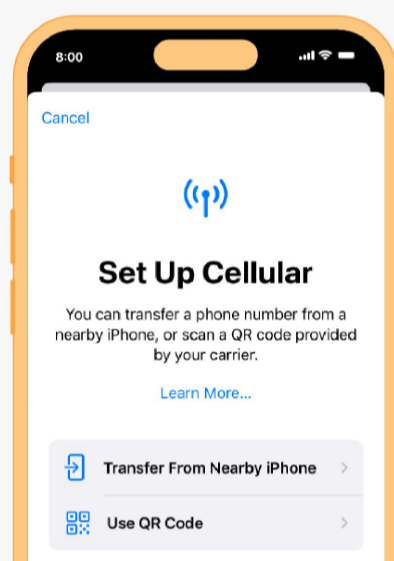

2.

Install eSIM using QR code

For a successful installation, you **MUST** have a stable WIFI connection

Click 'Use QR Code'
Scan the QR Code provided on Klook voucher

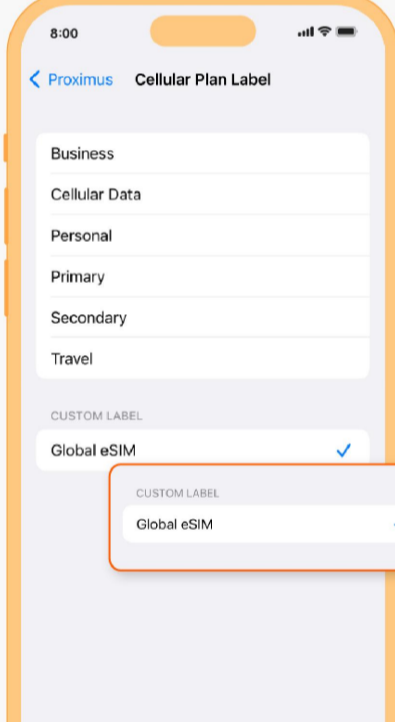

3.

Label your eSIM

You can choose to label your eSIM to help you identify it

Example: Klook-Testing

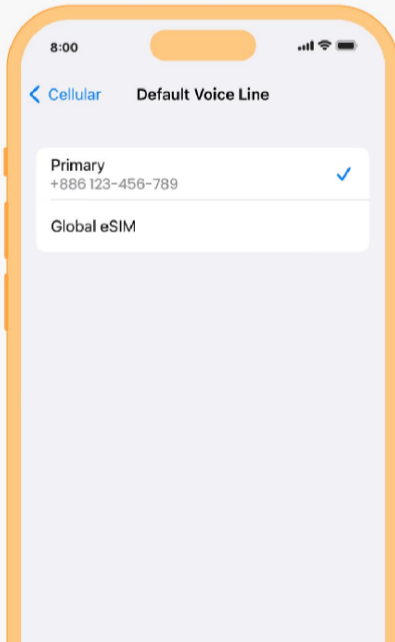

4.

Set the default line

Default line refer to the SIM that you would like to use for "calls" and "SMS message"

Set your 'Primary' plan as the default line to continue using your original SIM number to call and send messages

Click "Continue"

5.

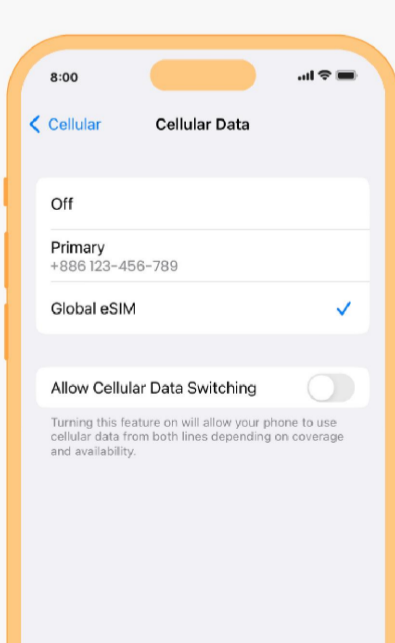

Set the SIM for cellular data

Set your new eSIM as the source for cellular data

Set your "New eSIM plan" as the default line for cellular data to use this eSIM for internet data

Turn off the "Allow Cellular Data Switching" to avoid using cellular data from your original SIM

Click "Continue"

6.

Turn "ON" the data roaming

We use regional data network to support the eSIM

1

Go back to the homepage
Go to Settings -> Cellular
Select the eSIM you just added

2

Turn on the "Data Roaming"
