The Yin Yang Sea is a bay where the sea has a mixture of blue and yellow waters. Surrounded by lush green mountains and landscapes, these provide a striking contrast to the blue and yellow waters.

P.S. for all you chemistry fans, the yellow in the water is said to be caused by Pyrite(fool's gold) which results in the formation of iron particles which can't be dissolved in water.

3

1150-1200: Explore the Golden Waterfall

While we all wished that it was real liquid gold flowing down these waterfalls, this is actually not the case. The water takes on a beautiful shade of gold because of the heavy metal deposits in the riverbed, giving rise to the name the Golden Waterfall.

The toxicity of the water makes it unsafe for human touch, so hands off!

You can't miss out on releasing a paper lantern on your visit to the old streets of Shifen. Write down your wishes and aspirations for the year on the lanterns and watch them take to the sky. This scene reminds us of the Disney movie Tangled!

The old railway still functions so be sure to avoid traffic if you're standing on the rail tracks for your photos! If you're feeling peckish, be sure to try one of the stuffed chicken wings!

DAY 2 | Shifen, Jiufen

7

1800: Explore Ximending!

Helmed the Harajuku of Taipei, you can find a variety of the trendiest apparel, eclectic restaurants, street snacks and even clubs and bars. Fill your bellies with Lu Rou Fan (Braised meat rice) or street food like grilled beef cubes or potatoes topped with cheese.
